

Setting the foundation for safety.

ALICE Assessments are done by certified professional assessors, from the inside out and outside in. We conduct the entire process for your organization, with you. ALICE assessors are ASIS International Board Certified and designated Physical Security Professionals. This certification is the highest in the field and our assessors must be recertified every three years. This recertification keeps them up to date on all best practices and recommendations.

Plan

Comprehensive

The ALICE Risk Assessment provides you with an inclusive list of the good, the weak, and the dangerous areas in your organization along with recommendations on a course of action needed to correct issues.

Prepare

Long-Term

The Risk Assessment report is only the beginning of our relationship. The ALICE Assessor will provide you with short-term, mid-term, and long-term plans to ensure the safety of your organization and personnel.

Protect

Certified

Comprehensive safety plans make a difference between life and death in Violent Critical Incidents. ALICE assessors are certified security experts who not only assess and report, but offer options for solutions to you.

What to expect from your ALICE Risk Assessment:

Our clients are dedicated to the safety and well-being of their staff and organization. Our in-depth assessments go beyond a form with yes/no answers and prepares you to exceed safety expectations. The ALICE Risk Assessment is the first step to providing a safer place to work, learn, and grow and we work with you every step of the way.

Our assessor will schedule a phone call to make introductions and outline the process and a timeline. We will request a series of documents to start the inside out portion of your assessment. Reviewing the documents will ensure there are no gaps in your plans and you are compliant to Federal recommendations.

While we review your documents, we will move forward with an intensive onsite walk. We will partner with a designated organization representative to walk the interior and perimeter during the day and night, as well as conduct spot interviews. This helps you recognize any risk you deal with every day and no longer notice.

You will receive a full written report when we complete the review of documents and the onsite visit. We will schedule a post-assessment meeting to debrief. This gives us the opportunity to go over the complete report and walk through what you are doing well and what areas need improvement. The full report and recommendations help you understand what you should continue doing, what needs to be addressed now, and what you need to budget for long-term.
